

**PROJECT: PROCUREMENT OF CONSULTING SERVICE FOR THE STRUCTURAL
ASSESSMENT OF ISIDRO S. RODRIGUEZ BUILDING**

SUBJECT : SUPPLEMENTARY INFORMATION ON THE TERMS OF REFERENCE

The primary focus of the structural assessment is to evaluate the integrity and performance of the **superstructure** (e.g. beams, columns, floors, and load-bearing walls). While the substructure (foundations, footings, and soil-structure interface) is not primarily the focus, provisional recommendations for its condition shall be provided based on the **available geotechnical and test data from nearby locations**.
